

Building Needs

The Borough has done a wonderful job of maintaining the building over the last 100 years, but there are several challenges that need to be addressed so that the community can take full advantage of this valuable and historic structure. To ensure the Borough Hall continues to serve the community significant improvements and updates are needed, including:

- Updates to ensure American with Disabilities Act compliance,
- Modernization of heating and air conditioning,
- Updates to key infrastructure including plumbing, electrical, sidewalks and windows, and
- Providing for building safety and security needs.
